*hooks under bumper arm  
of modern passenger cars*

- New design incorporates universal hook that can quickly and easily be positioned to any one of 18 different lows.
- Simply pull hook up under bumper arm. It instantly seats itself in proper notches of swivel top. A few easy strokes on the handle—and wheel of car clears road or floor.
- Handles 99% of all current model passenger cars—quickly—easily—safely.
- No need to get on knees . . . No crawling under car . . . Motorist can stand up to position and operate this hydraulic jack.
- Even a youngster can position this jack and raise car in less than one minute . . . Lower and remove in less than five seconds.
